

more key facts...

Is it compact?

You will still be able to pack your boot with most things like groceries, luggage, sports equipment, camping gear, etc.

Can LPG be installed to diesel engines?

Yes. It can on 4 wheel drives and light trucks. You can have a dual system that uses a mix of both LPG and diesel, providing a reduction of up to 20% in fuel costs.

Can I buy LPG easily?

You can travel throughout Perth and WA or from Perth to Sydney and never be caught short finding a place to fill up on LPG.

Does LPG help reduce 'Global Warming'?

Auto Edge LPG conversions produce significantly less greenhouse gas and other harmful emissions associated with vehicle fuel consumption. LPG is also non-corrosive, non-toxic and lead free.

Will it lower the value of my car?

LPG vehicles are in huge demand on the used car market.

We won't be beaten on service and repairs.

We also give you the edge with regular vehicle servicing, tune-ups and repairs.

- Tune up or service from only \$85*

It's a changing world.

And there's never

been a better time

to change to Auto Edge LPG.

Your LPG motoring partner

The Auto Edge difference.

Get the edge...

Nobody knows more about LPG (auto gas) engine conversions than the team at Auto Edge.

It's not something we dabble in as a sideline, we are experts and passionate about LPG engine conversions.

For over a decade we have successfully converted thousands of vehicles of all makes and models.

Just as important, we just don't install and send you on your way. We are here every step of the way to provide ongoing servicing to your vehicle.

Auto Edge. Your LPG motoring partner.

There are LPG conversions and then there is an Auto Edge Conversion. Make sure you are getting the best system and on going servicing for your car, insist on Auto Edge.

Why we have the edge...

- Industry leader for ten years in LPG installation
- Fully qualified, specialist LPG auto technicians
- 3 year, 100,000 km Australia-wide warranty at no extra
- All work 100% guaranteed
- Full on-going service support
- We provide all other aspects of mechanical repairs and servicing.
- On-site tank testing
- Kleenheat approved LPG installer
- We make it easy to apply for your Government rebates.
- Latest technology and equipment
- Thousands of satisfied customers

Key facts

about Auto Edge LPG systems.

How much does it cost?

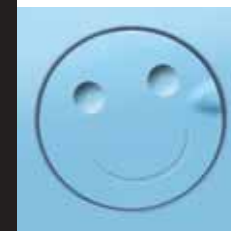

How much will I save?

Prices start from around \$2500; however generous government subsidies mean you can pay a substantially reduced price.

Will LPG always be cheaper than petrol?

LPG has always been relatively cheaper than petrol or diesel fuel, so you'll laugh all the way to the tank.

Is LPG safe?

To put it bluntly, there is more chance of a petrol engine igniting in a crash than an LPG vehicle. Thousands of motorists in Australia including just about all Taxi fleets enjoy safe LPG motoring everyday.

Will LPG affect my engine?

LPG actually reduces engine wear and tear. It's a cleaner burning fuel than petrol, so engine life is actually extended. There is also less sludge build up in the engine.

Can I still retain my existing fuel tank?

Yes. You can have a dual system that allows you to retain your existing fuel or diesel tank.
